

WHEREVER BUSINESS HAPPENS, LASTPASS & GOTO ARE THERE

SECURE ACCESS AND POWERFUL COLLABORATION FOR YOUR EMPLOYEES

LastPass...

GoToConnect

Current events demand IT leaders ensure they're ready to support long-term remote work and keep their organizations running and driving growth. This includes providing remote teams with access to sensitive business apps and critical communications. LogMeIn keeps your remote workforce productive and secure when you combine the security of LastPass and the seamless, unified communication of GoToConnect.

Your One Solution for Secure Communication and Collaboration

Although you've secured employee access to critical applications using LastPass, your job isn't done yet.

GoToConnect supports your security initiatives by providing your entire organization with business-grade phone, meetings, messaging and more in one secure, unified application. With amazing reliability and all-inclusive pricing, GoToConnect's cloud-based application is incredibly easy to manage wherever you are.

- 24/7 Customer Support

Remote Work, Remote Security

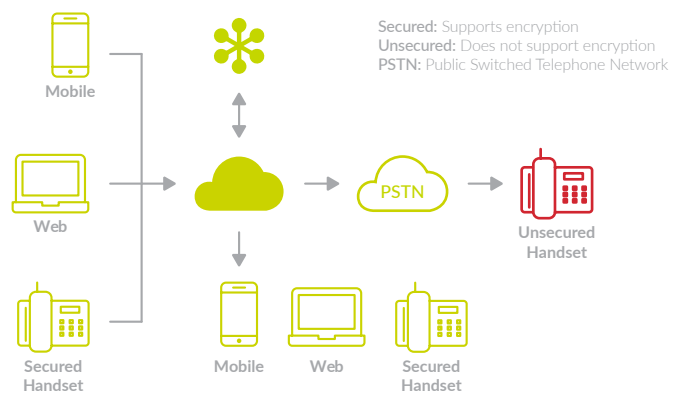

LastPass integrates with GoToConnect to simplify onboarding and secure access to critical communications features for remote workers.

Secure Calls

GoToConnect encrypts calls made between its encrypted enabled endpoints—like a state-of-the-art handset recently purchased from LogMeIn and our web, mobile, and desktop applications.

Secure Meetings

GoToConnect ensures only the right people have access to meetings. Users can lock meetings and require passwords they designate to keep out unwanted attendees.

Get Award-Winning Communications and Security with One Company

GoToConnect and LastPass are owned exclusively by LogMeIn which greatly simplifies your vendor management. Only LogMeIn is uniquely positioned to empower people and businesses to do their best work simply and securely: whenever, however, and most importantly wherever.
